

Omnia Islam

Hadayek El Ahram, Giza, Egypt | +201060201268 | omnia.islamm@gmail.com | [linkedin.com/in/omnia-islam](https://www.linkedin.com/in/omnia-islam) | github.com/omnia-islam

Career Objectives

Computer Science student at Misr University for Science and Technology with hands-on training in Frontend Development, RPA, and AI Automation. Experienced in building practical web projects and developing UiPath automation workflows using REFramework, Orchestrator Queues, and Excel reporting. Strong foundation in C++, Python, Java, SQL, Data Structures, and Algorithms, with a problem-solving mindset. Seeking an internship in Software Development, Frontend Development, or RPA/Automation.

Education

Misr University for Science and Technology (MUST) — Bachelor of Computer Science *September 2024 – Present*

Faculty of Information Technology

CGPA: 3.64 / 4.00 | Al Motamayez District, Giza Governorate

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Introduction to Artificial Intelligence, Computer Architecture, Embedded Systems

Internships

React Frontend Developer Trainee — Digital Egypt Pioneers Initiative (DEPI)

July 2026 – Present

Duration: 159 Hours

- Developed 6 responsive frontend projects and templates, including Egypt Tour Guide Version 1 and Version 2, MyFood, Pizza, and Cafe templates, as well as a JavaScript-enhanced version of Egypt Tour Guide Version 2, using HTML5, CSS3, JavaScript, Flexbox, CSS Grid, and semantic HTML.

RPA and AI Automation Trainee — Digital HUB / Orange Digital Center

June 2026

Duration: 1 Month | Completed

- Analyzed the ACME System using AS-IS/TO-BE process modeling and implemented a UiPath automation workflow with a Dispatcher/Performer architecture, REFramework, and Orchestrator Queues.
- Delivered end-to-end automation for 10 transactions, covering data extraction, transaction processing, Excel report reconciliation, scheduled email delivery, and system login.
- Completed an Email Summary Agent project using agentic automation concepts to process and summarize email content.

Projects

ACME System RPA Automation ([GitHub](#))

July 2026

Affiliation: Digital HUB / Orange Digital Center — RPA and AI Automation Training

Tools: UiPath, REFramework, Dispatcher/Performer, Orchestrator Queues, DataTables, Excel

- Engineered a 10-transaction ACME System automation workflow using a Dispatcher/Performer architecture, extracting work items into DataTables and processing them through Orchestrator Queues.
- Transformed the manual AS-IS process into a streamlined TO-BE workflow with business rules, Excel reporting/reconciliation, and scheduled email notifications, troubleshooting queue and file-lock issues along the way.

Email Summary Agent ([GitHub](#))

July 2026

Affiliation: Digital HUB / Orange Digital Center — RPA and AI Automation Training

Tools: UiPath, Agentic Automation, AI Automation, Python

- Created an agentic automation workflow that processes email content and generates a consolidated summary, applying AI and agentic automation concepts to streamline information extraction.

Decode Ways ([GitHub](#))

May 2026

Affiliation: Misr University for Science and Technology (MUST) — Course Project (Team Project; led the core algorithm concept)

Tools: C++, Dynamic Programming, Algorithms

- Designed a Dynamic Programming solution for the Decode Ways problem, achieving $O(n)$ time and $O(n)$ space complexity by reusing previously calculated states instead of recomputing overlapping subproblems.

Embedded Systems Projects ([GitHub](#))

May 2026

Affiliation: Misr University for Science and Technology (MUST) — Course Project (Team Project)

Tools: Arduino, C/C++, Tinkercad, MQ-2, L293D, PWM

- Built and simulated (via Tinkercad) an MQ-2 gas leakage detector with buzzer alerts and a DC motor speed controller using an L293D motor driver with PWM.
- Simulated a password-based authentication system using keypad input, LCD feedback, a 7-segment display, and buzzer alerts.

Company Database Management System ([GitHub](#))

March 2026

Affiliation: Misr University for Science and Technology (MUST) — Course Assignment

Tools: SQL, Microsoft SQL Server, ER Modeling, ERD

- Modeled an Entity-Relationship structure and ERD for a company-management database, implementing relational tables with primary and foreign keys.
- Applied SQL operations including CREATE, INSERT, SELECT, UPDATE, and JOIN to create, manipulate, and retrieve structured data.

Skills

Technical Skills

Programming Languages: C++, Python, Java, JavaScript, SQL

Web Development: HTML5, CSS3, JavaScript, React.js, Responsive Web Design, Flexbox, CSS Grid, Semantic HTML

RPA and Automation: UiPath Studio, UiPath Studio Web, UiPath Orchestrator, REFramework, Dispatcher/Performer, Orchestrator Queues, DataTables, RPA, AI Automation, Agentic Automation

Databases: Microsoft SQL Server, Relational Databases, SQL Queries, ER Modeling, ERD, Primary Keys, Foreign Keys, JOIN

Embedded Systems: Arduino, C/C++, MQ-2 Sensor, LCD, Keypad, Buzzer, L293D, PWM, 7-Segment Display, Tinkercad

Computer Science: Object-Oriented Programming, Data Structures, Algorithms, Dynamic Programming, Problem Solving, Complexity Analysis

Tools: Visual Studio Code, UiPath, Git, GitHub

Language Skills

Arabic: Native

English: Upper-Intermediate (B2)

Courses and Credentials

- **IBM SkillsBuild — AI Literacy Digital Credential | Completed August 2026** — AI fundamentals, generative AI concepts, responsible AI, and the impact of AI on work and society.
- **Oracle — AI for You | 32 Hours | Completed August 2026** — AI and machine learning fundamentals, generative AI, and responsible AI applications.
- **Huawei — HCIA-AI V4.0 Course | Completed with Full Marks April 2026** — Machine learning, deep learning, neural networks, computer vision, and natural language processing (NLP) fundamentals.
